

## Barracuda, ReversingLabs, Telefonica and Zscaler Join Cyber Threat Alliance as Contributing Members

February 13, 2015

### Co-founders Welcome New Members in Concerted Effort to Combat Advanced Cyber Threats

SANTA CLARA, Calif., Feb. 13, 2015 /PRNewswire/ -- Fortinet (NASDAQ: FTNT), McAfee Labs, Palo Alto Networks® (NYSE: PANW) and Symantec (NASDAQ: SYMC), co-founders of the industry's first cyber threat alliance, today announced that Barracuda Networks, Inc. (NYSE: CUDA), ReversingLabs, Telefónica, and Zscaler have joined the Cyber Threat Alliance in its efforts to make united progress in the fight against sophisticated cyber adversaries.

Palo Alto NetworksThe mission of the [Cyber Threat Alliance](#) is to drive a coordinated industry effort against cyber adversaries through deep collaboration on threat intelligence and sharing indicators of compromise.

While past industry efforts have often been limited to the exchange of malware samples, the Cyber Threat Alliance provides more actionable threat intelligence from contributing members, including information on zero-day vulnerabilities, botnet command and control (C&C) server information, mobile threats, and indicators of compromise (IoCs) related to advanced persistent threats (APTs), as well as the commonly-shared malware samples. By raising the industry's collective actionable intelligence, alliance participants will be able to deliver greater security for individual customers and organizations.

#### QUOTE:

- "We appreciate the charter of the Cyber Threat Alliance and believe there should be closer collaboration across security researchers, industry, education, and government. We look forward to sharing critical data across threat vectors that can be leveraged not only for delivering Total Threat Protection for our customers but also toward benefiting the community as a whole."
  - Stephen Pao, GM Security of [Barracuda](#), which provides cloud-connected security and storage solutions that simplify IT
- "Telefónica firmly believes that the collaboration against cybercrime with leading companies in the security practice will lead us to a better cyber-resilience in the digital world. We are excited about the opportunity to work with the CTA members. Our internal capabilities together with our Cyber Security services based on digital intelligence that Telefónica has been developing for many years, will add value to this alliance and will boost CTA member's knowledge for better collaborative protection."
  - Pedro Pablo Pérez, CyberSecurity Director, [Telefónica](#), which is one of the largest telecommunications companies in the world.
- "Organizations combatting today's cyber threats require both internal monitoring and external context to identify an adversary's intentions and tactics. The Cyber Threat Alliance provides a collaborative vehicle for sharing critical external information and improving identification of advanced threats."
  - Mario Vuksan, CEO of [ReversingLabs](#), which provides enterprises and security vendors a foundation for protecting digital assets.
- "Today's security threats are more insidious and difficult to thwart than ever and they are outpacing the ability of organizations to protect themselves. The exchange of actionable threat intelligence fostered by the Cyber Threat Alliance is a critical step toward a new level of industry collaboration that will result in greater security for vendors and clients alike."
  - Michael Sutton, Vice President, Security Research for [Zscaler](#), which provides a Security-as-a-Service platform delivering a safe and productive Internet experience.

#### ABOUT FORTINET

Fortinet (NASDAQ: FTNT) protects the most valuable assets of some of the largest enterprise, service provider and government organizations across the globe. The company's fast, secure and global cyber security solutions provide broad, high-performance protection against dynamic security threats while simplifying the IT infrastructure. They are strengthened by the industry's highest level of threat research, intelligence and analytics. Unlike pure-play network security providers, Fortinet can solve organizations' most important security challenges, whether in networked, application or mobile environments - be it virtualized/cloud or physical. More than 210,000 customers worldwide, including some of the largest and most complex organizations, trust Fortinet to protect their brands. Learn more at [www.fortinet.com](http://www.fortinet.com).

#### ABOUT MCAFEE LABS, PART OF INTEL SECURITY

McAfee Labs is the threat research division of Intel Security. Its team of more than 400 researchers collects threat data from millions of sensors across key threat vectors—file, web, message, and network. It then performs cross-vector threat correlation analysis and delivers real-time threat intelligence to tightly integrated McAfee endpoint and network security products through its cloud-based McAfee Global Threat Intelligence service. McAfee Labs also develops core threat detection technologies—such as DeepSAFE, application profiling, and graylist management—that are incorporated into the broadest security product portfolio in the industry. The mission of Intel Security is to give everyone the confidence to live and work safely and

securely in the digital world. [www.intelsecurity.com](http://www.intelsecurity.com).
